WE ENCOUNTER JESUS - WE GROW TOGETHER IN HIS LOVE

Making disciples who encounter the saving love of Jesus Christ
Growing together by being known, loved and supported
Empowered by the Holy Spirit to worship, witness, and serve

Pope Francis has released his message for the **2024 World Day of Social Communications**, focusing on the theme: Artificial Intelligence and the Wisdom of the Heart: Towards a Fully Human Communication. This year's theme is closely linked to the Pope's message for the World Day of Peace, which was devoted to the development of systems of artificial intelligence (AI).

AI is "radically affecting the world of information and communication, and through it, certain foundations of life in society," says the Pope in his Communications Day message, adding that "these changes affect everyone." So, the Pope asks, "how can we remain fully human and guide this cultural transformation to serve a good purpose?" In answering this question, the Holy Father notes that "*at this time in history, which risks becoming rich in technology and poor in humanity, our reflections must begin with the human heart.*"

He recalls that, in the Bible, the heart is seen as the place of freedom and decision-making, "symbolising integrity and unity, while also engaging our emotions, desires, and dreams." But, he continues, the heart is, above all, "the inward place of our encounter with God." "Wisdom of the heart, then, is the virtue that enables us to integrate the whole and its parts, our decisions and their consequences, our nobility and our vulnerability, our past and our future, our individuality and our membership within a larger community," says the Pope.

The Holy Father goes on to stress that such wisdom cannot be sought from machines. Although the term "artificial intelligence" has replaced the term "machine learning," he said, "the very use of the word 'intelligence' can prove misleading." The Pope explained that it is not enough to be able to store data, like machines do, but that this data must be made sense of, and "human beings alone" are capable of this.

Pope Francis recalls that "it is up to us to decide whether we will become fodder for algorithms or will nourish our hearts with that freedom without which we cannot grow in wisdom." Only together, he concludes, can we increase our capacity for discernment and vigilance and for seeing things in the light of their fulfilment. Pope Francis then prays that humanity may never lose its bearings, and that the wisdom that was present before all modern technology may return to us.
